## Best Educational Toys of 2007

### The top educational and learning toys of the year

Educational toys are the rage nowadays. Most toys have some educational element in them. Besides traditional educational toys, edutainment toys are slowly gaining the lion's share of the toy marketplace. This year, the educational toys which have made the cut include toys like the Hot Wheels Accelerator Laptop, Piano Made Easy, Brain Quest DVD games and many others. Here's a list of the best educational toys of 2007.

#### 5. Piano Made Easy

Finally, something refreshingly different! Piano Made Easy (the name is self-explanatory) is brought to us by The Mayron Cole Music Conservatory, Inc. which has spent the last 32 years developing and publishing The Mayron Cole Piano Method that is used by schools and piano teachers all over the country. I compared it to Fisher-Price's I Can Play Piano, and was bowled over by the difference in both the products. Piano Made Easy is so much more professional, well designed and interesting. If you are looking for a tool to teach your children a musical instrument and develop an interest in music, this is the one to go in for.
